information on t (mm^{-2})
picks, photon-limited
picks, ε = 5 %
(b) photon-limited
CRLB SD of t (µm), amplitude free
random IQR ($k \leq 30$)
random median
uniform
information-optimal
all 248 channels
within 10 %: k = 28
unsupervised AE (k = 8)
channels k
(c) model error ε = 2 %
random IQR ($k \leq 30$)
random median
uniform
information-optimal
all 248 channels
within 10 %: k = 30
unsupervised AE (k = 8)
channels k
